

Rotoflow Training Course: Introduction to Turboexpanders

Date: Wednesday, June 23, 2021

Time: UK/Central Africa: 2pm to 3pm
Europe/South Africa: 3pm to 4pm
Russia/Middle East: 4pm - 5pm

[CLICK TO REGISTER](#)

What topics does the training cover?

- General process cycle overview
- Different types of expanders
- Thermodynamics – the basics
- Centrifugal compressors
- Expander components
- Expander auxiliaries
- Expander design basics

Who is the training right for?

This training is designed for plant processing operators and maintenance personnel, but anyone on your team that wants to learn more about rotating equipment is welcome to attend.

Who is delivering the training?

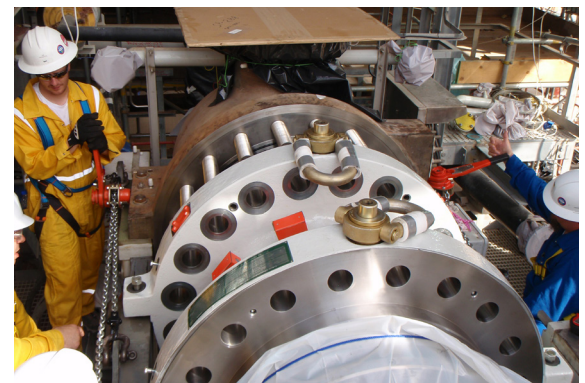

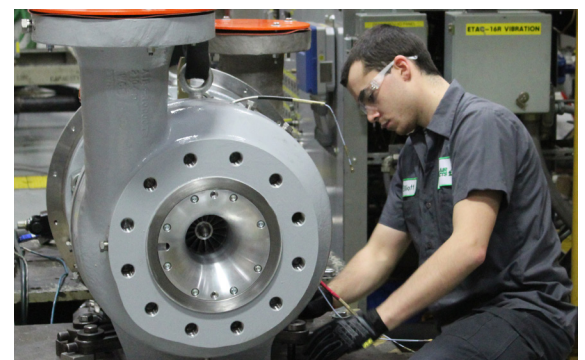

The training program is led by our Rotoflow engineering design and field service experts.

How long does the session last?

The training sessions are one hour; 45 minutes of instruction with 15 minutes of Q&A.

Where is training held?

Our programs are currently being offered online and can also be held within your facility or at one of our locations.

Why Rotoflow?

Rotoflow, an Air Products business, combines the industry's most trusted name in turbomachinery with world-leading industrial gas expertise. As one of the world's only OEMs both manufacturing and operating turbomachinery, we understand how important it is to keep your equipment running at peak performance, and we are here to help you do so. Our team of skilled engineers, field service technicians, and aftermarket specialists can handle any equipment issue you may encounter. Through training sessions like this one, we share this experience and expertise directly with you.

How do I get more information?

To learn more about our training services and course curriculum, or to set up a program for your team, please call 610-706-6000 or email connect@rotoflow.com.

Experience more. *Together.*
